

GBS Zero.190 calibre

£23,995^{Inc}

Overview:

With the Zero.190 Calibre being the most popular car within our current range, it offers complete diversity and is equally at home as a Grand Tourer or on Track. The car consists of a steel space frame with fully independent suspension at the front and rear of the car fitted with Pro-race Wheels by Team Dynamics. Each car is meticulously hand crafted to an individual's specification by only the best skilled and passionate individuals looking to deliver engineering excellence.

Whether you take your GBS Zero.190 Calibre around the Track or Europe, each journey will deliver a unique experience for you and your passenger.

Performance:

The Zero.190 Calibre is powered by a 2.0Ltr normally aspirated Ford Duratec engine which offers 160Bhp as standard fitted with a plenum and the standard throttle body. Alternatively it can be upgraded to a 190Bhp version fitted with a set of ATR Throttle bodies and an engine re-map to give you maximum Bhp and Torque thus improving the acceleration rate of 0-60 which can be achieved in around 4.1 seconds. In the corners the car has unbelievable levels of grip & balance handling in a very controlled & precise manner, ultimately resulting in an exhilarating experience.

Looks:

The external body work of the car is very much the same throughout our range and is a mix of GRP & traditional Aluminium Fitted over a Steel space framed chassis all of which is manufactured by GBS in our very own Factory. We also offer a range of ATR Carbon Fibre up-grades manufactured by US using the very latest infusion techniques developed in house. This in turn makes the car very pleasing on the eye.

Feel:

The interior is finished to the highest standard and has to be one of the best you will find in a bespoke built car of this type. Not only are the seats extremely comfortable but coupled with the driving position along with the steering makes for almost perfect ergonomics. Two body widths are also available depending on Grand Touring or Track usage. Once you have attended your seat fitting the dashboard layout is tailored to best suit your needs with only the best Smiths Flight Gauges used. This we feel is a must as the Gauges truly represent the era of this type of car.

Optional Extra's

GBS Zero.190 calibre

Name: _____ Date: _____

Performance:

- Calibre 0.190 - 160 bhp engine upgrade to 190
- ATR Aluminium Radiator
- Oil Cooler
- LSD

Chassis:

- Zero GT
- Cobra Hoops
- LHD (European & International)
- Spare wheel Tyre & Brackets c/w no Plate
